The image displays a collection of 10 distinct templates for brainstorming and idea prioritization, arranged in a grid-like fashion. Each template is designed to help users generate and evaluate ideas effectively.

- Brainstorm & idea prioritization:** A template for creating a mind map to explore ideas and prioritize them based on importance and feasibility.
- Before you collaborate:** A template for preparing a list of questions to ask before a brainstorming session to ensure it is productive.
- Define your problem statement:** A template for defining the problem to be solved, including a clear statement of the problem and the goal of the brainstorming session.
- Brainstorm:** A template for generating ideas, featuring a central topic and four surrounding boxes for different types of ideas (e.g., "What if?", "What if not?", "What if only?", "What if never?").
- Group ideas:** A template for organizing ideas into groups, featuring a central topic and four surrounding boxes for different types of ideas (e.g., "What if?", "What if not?", "What if only?", "What if never?").
- Prioritize:** A template for prioritizing ideas based on importance and feasibility, featuring a 2x2 matrix with axes labeled "Importance" and "Feasibility".
- Quick solutions:** A template for generating quick solutions to a problem, featuring a central topic and four surrounding boxes for different types of ideas (e.g., "What if?", "What if not?", "What if only?", "What if never?").
- Keep moving forward:** A template for keeping track of progress and moving forward with the brainstorming process, featuring a central topic and four surrounding boxes for different types of ideas (e.g., "What if?", "What if not?", "What if only?", "What if never?").
- Brainstorming session:** A template for conducting a brainstorming session, featuring a central topic and four surrounding boxes for different types of ideas (e.g., "What if?", "What if not?", "What if only?", "What if never?").
- Idea prioritization:** A template for prioritizing ideas based on importance and feasibility, featuring a 2x2 matrix with axes labeled "Importance" and "Feasibility".
